Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese document '577 in view of German document (DE 3535212)

Japanese document discloses a system comprising a welding head (10) which is constituted by a nozzle (9), the head being carried by the end of an arm (2) mounted so as to be articulated to a movable carriage (1) and in that it comprises means for providing the welding head with filler metal (5), welding flux (thru 11) and electrical power. Japanese document discloses the invention substantially as claimed. However, Japanese document is silent about including a chamfer guide. German document '212 teaches a chamfer guide (see Fig. 1). It would have been considered obvious to one of ordinary skill in the art to modify Japanese document to include chamfer guide as taught by German document in order to support the welding device when positioned in the groove.

Allowable Subject Matter

3. Claims 1-8,11 are allowed.
